DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27 drawn to a compound corresponding to Formula I, IV, V, VI, VII, VIII, IX and their corresponding isomers, tautomers, salts and prodrugs, thereof, and the compounds recited in claim 27, classified in class 514, subclass 256, for example.
 - II. Claim 28, drawn to a process for the treatment or prevention of a condition in a mammal which is modulated by LXR, comprising administering to a mammal in need thereof a therapeutically effective dose of a compound according to claim 1, classified in class 514, subclass 357, for example.
 - III. Claim 29, drawn to a process for the treatment or prevention of a condition in a mammal which is modulated by LXR, comprising administering to a mammal in need thereof a therapeutically effective dose of a compound according to claim 9, classified in class 514, subclass 357, for example.
 - IV. Claim 30, drawn to a process for the treatment or prevention of a condition in a mammal which is modulated by LXR, comprising administering to a mammal in need thereof a therapeutically effective dose of a compound according to claim 27, classified in class 514, subclass 357, for example.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and (II, III, IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the process of treatment or prevention of a condition in a mammal, which is modulated by LXR, can take pathways other than the removal of cholesterol from peripheral tissues/cells, which can entail the use of therapeutic compounds, like 2-(m-chloroanilino)-5-methyl-trans-cinnamic acid.
- 3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 4. This application contains claims directed to the following patentably distinct species: Formula I, IV, V, VI, VII, VIII, IX and their corresponding isomers, tautomers, salts and prodrugs, thereof and the compounds recited in claim 27. The disclosed species are independent or distinct because the plurality of the functional groups that can be attached to the structures would invariably lend distinct attributes to each formula.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1,7,8,9,17,18, 23 and 27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the disclosed species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. A telephone call was made to Ms. Lisa Samuels, *Esq.* on September 12, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a disclosed species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MLouisa Lao whose telephone number is 571-272-9930. The examiner can normally be reached on 8:30am to 5:30pm Mondays to Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
